Dear colleagues and friends,

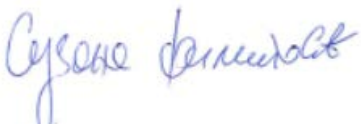
We have great pleasure to welcome you to the Advanced Ceramic and Application X Conference organized by the Serbian Ceramic Society in cooperation with the Institute of Technical Sciences of SASA, Institute of Chemistry Technology and Metallurgy, Institute for Technology of Nuclear and Other Raw Mineral Materials and Institute for Testing of Materials. This Conference is dedicated to Prof. Dr. Vojislav Mitić, president of Serbian ceramic society, who passed away in September 2021.

It is nice to host you here in Belgrade in person. As you probably know, Serbia launched a vaccination campaign at the beginning of last year, so up to date more than 70 percent of the adult population has been vaccinated. Since there is no one statistic to compare the COVID19 outbreaks and fears for loved ones in different countries, we believe that we all suffer similarly during this pandemic. That is why we appreciate even more your positive attitude and readiness to travel in this uncertain time. We deeply hope that the ACA X Conference will be worth remembering, that you will respect all COVID-19 safety measures at SASA building, that you will have a nice time here and that ultimately you will return to your home safely. We are very proud that we succeeded in bringing the scientific community together again and fostering the networking and social interactions around an interesting program on emerging advanced ceramic topics. The chosen topics cover contributions from fundamental theoretical research in advanced ceramics, computer-aided design and modeling of new ceramics products, manufacturing of nano-ceramic devices, developing of multifunctional ceramic processing routes, etc.

Traditionally, ACA Conferences gather leading researchers, engineers, specialists, professors and PhD students trying to emphasize the key achievements which will enable the widespread use of the advanced ceramics products in the High-Tech industry, renewable energy utilization, environmental efficiency, security, space technology, cultural heritage, etc.

Serbian Ceramic Society was initiated in 1995/1996 and fully registered in 1997 as Yugoslav Ceramic Society, being strongly supported by American Ceramic Society. Since 2009, it has continued as the Serbian Ceramic Society in accordance with Serbian law procedure. Serbian Ceramic Society is almost the only one Ceramic Society in South-East Europe, with members from more than 20 Institutes and Universities, active in 9 sessions. Part of our members are also members of the Serbian Chapter of ACerS since 2019. Their activities in the organization of this conference is highly recognized. To them and all of you thanks for being with us here at ACA X.

Dr. Nina Obradović
President of the Serbian Ceramic Society



Dr. Suzana Filipović
President of the General Assembly of the Serbian Ceramic Society

Conference Topics

- Basic Ceramic Science & Sintering
- Nano-, Opto- & Bio-ceramics
- Modeling & Simulation
- Glass and Electro Ceramics
- Electrochemistry & Catalysis
- Refractory, Cements & Clays
- Renewable Energy & Composites
- Amorphous & Magnetic Ceramics
- Heritage, Art & Design

The Tenth Serbian Ceramic Conference Advanced Ceramics and Application

Conference Information:

Conference location: Belgrade (Beograd) – the capital of Serbia, Serbian culture, education, science and economy, having about 2.5 million habitants. Belgrade is situated in South-Eastern Europe, on the Balkan Peninsula, at the confluence of the Sava and Danube Rivers in north- central Serbia. The official language is Serbian, while foreigners can use English.
Conference venue: Serbian Academy of Sciences and Arts - SASA, Great Hall (2nd floor) and Halls 2, 3 (1st floor), Knez Mihailova 35, Belgrade, Serbia.
Dress code: Serbian Academy of Science and Arts is a distinguished institution of supreme national importance. We kindly ask you to respect a dress code and not to wear short skirts and pants (above the knee); tank top and sleeveless shirts; flip-flops and open-toed sandals.

Covid-19 outbreak - information for conference participants:
Prevention and general precautions:

- avoid close contact (within 1 m) with people who are ill with fever, cough or respiratory symptoms;
- wear a face covering in enclosed environments;
- wash or sanitize your hands frequently – after coughing, before preparing food or eating, after toilet use, after contact with ill persons, and during exposure to high traffic public areas;
- cover your mouth and nose with a disposable tissue when coughing or sneezing and use the nearest waste receptacle to dispose of it after use. If you do not have a disposable tissue, cough or sneeze in your elbow;
- strictly do not attend the conference if you are unwell. Stay at home or your accommodation if you become unwell, develop a fever or respiratory symptoms;
- if you or other participants in the conference hall are unwell, inform the conference organizers and arrange to get an assessment from a healthcare provider.

Conference fee: Standard fee for foreign participants: 300 EUR; Standard fee for domestic participants: 12000 RSD; **Discounts**: Members of SCS, Invited lecturers and PhD Students: 50%; Plenary lecturers & the last year winners (oral and poster presentations): Free of charge.

Invoice and bank details for Conference fee payment: Banka Intesa ad Beograd, Account No. 160-380150-55, notification: Conference fee – participant name.

Paying of the conference fee and Gala dinner at site will be available only in cash.
Registration:
26. 09.2022 (8.00-9.00A.M.-2nd Floor) & 27.09.2022 (8.00-9.00A.M.–1st Floor)
Posters instalation:
26.09.2022 (16.30-17.00) & 27.09.2022 (8.30-9.00) CLUB SASA
After each session, participants should remove their posters!

Useful telephone numbers:
Police:192
Firemen:193
Ambulance:194

Taxi services: For the taxi services from Belgrade Nikola Tesla Airport to any destination in Belgrade area and further, please contact TAXI INFO desk, located in the baggage area.

Time zone: Belgrade and Serbia are located in the Central European time zone region GMT + 1
Electricity: The electricity voltage in Belgrade is 220V. Electrical outlets are standard EU.
Currency: The official currency in Serbia is dinar, abbreviated RSD. Money may be exchanged in all banks and authorized exchange offices. Exchange rate for 1 EUR is around 118 RSD. Cash may be taken from ATMs 24 hours a day. Credit cards are accepted in shops, hotels and restaurants.
Water: Tap water in Belgrade is safe to drink.

Abstracts and papers publication: The official language of the conference is English. Conference abstracts will be published in the **Book of Abstracts**.
Limited number of papers presented at the conference will be possible to publish in **Science of Sintering.**

Type of presentation: Visuals for oral presentations should be in Microsoft PowerPoint (.ppt or .pptx) or Adobe Acrobat Reader 9 (.pdf). Any animation or video files must be compatible with Windows 7 and Windows Media Player. Bring your presentation to speaking desk at the beginning of the day when your presentation will be. Posters should be prepared in dimension: 70x100 cm. The official language on conference is English.

14.00 - 15.00 **Buffet Lunch** **Club SASA**

Great Hall, 2nd Floor

15.00 - 17.00 **Ceramic & Sintering**

Chairpersons: Nebojša Labus & Darko Kosanović

15.00 - 15.30 **PL Process technologies and applications of Basalt fiber reinforced SiOC composites**

Rainer Gadow, Patrick Weichand
Institut für Fertigungstechnologie keramischer Bauteile, Universität Stuttgart, Allmandring 7b, D-70569 Stuttgart, Germany

15.30 - 16.00 **PL Zeta phase tantalum carbide: a high strength, high toughness ceramic**

William G. Fahrenholtz
Missouri University of Science and Technology, Department of Materials Science and Engineering, 222 McNutt Hall; 1400 N. Bishop Avenue, Rolla, MO 65409, United States

16.00 - 16.20 **INV Dense pollucite ceramics obtained by hot-pressing as a potential matrix for the immobilization of cesium ions**

Mia Omerašević
Department of Materials Science, Vinča Institute of Nuclear Sciences - National Institute of the Republic of Serbia, University of Belgrade, 11000, Belgrade, Serbia

16.20 – 16.40 **INV The phase content effect on the functional properties of $BaTiO_3/CoFe_2O_4$ composites prepared by different synthetic methods**

Ljubica Andjelković
University of Belgrade-Institute of Chemistry, Technology and Metallurgy, Department of Chemistry, Njegoševa 12, Belgrade, Serbia

16.40 – 17.00 **INV Synthesis and characterization of high-temperature strontium doped monazite ceramics**

Miljana Mirković
Department Materials, „VINČA" Institute of Nuclear Sciences - National Institute of the Republic of Serbia, University of Belgrade, Belgrade, Serbia

17.00 - 18.30 **Poster Session* (P1-P24) & Round Table ACerS** **Club SASA**

19.30 **Conference Gala dinner** **Hotel Palace**

***16.30 – 17.00** **Poster Installation** **Club SASA**

Tuesday, September 27th, 2022.

Hallway, 1st Floor

08.00 - 09.00 **Registration & Poster Installation**

09.00 - 10.00 **Poster Session (P25-P49)** **Club SASA**

Hall 2, 1st Floor

10.00 - 13.05 **Ceramic & Sintering Amorphous & Magnetic Ceramics**
Chairpersons: Nebojša Labus & Darko Kosanović & Nebojša Mitrović

10.00 - 10.30 **PL Rapid sintering of structural and functional ceramics without application of pressure**

Karel Maca, Vladimír Prajzler, Radek Kalousek, David Salamon
Brno University of Technology, CEITEC, Brno, Czech Republic

10.30 - 10.50 **INV Multi-phase $(Zr,Ti,Me)B_2$ solid solutions: preparation and microstructure evolution**

Laura Silvestroni[1], Nicola Gilli[1], Nina Obradović[2], Suzana Filipović[2], Jeremy Watts[3], William G. Fahrenholtz[3]

13.00 - 14.00 Buffet lunch Club SASA

Hall 2, 1st Floor

14.00 – 16.30 Electrochemistry & Catalysis
Chairpersons: Maja Pagnacco & Dalibor Marinković

14.00 - 14.30 PL Alumina as electrode material
Zorica Mojović
University of Belgrade, Institute of Chemistry, Technology and Metallurgy, Njegoševa 12, 11000 Belgrade, Serbia

14.30 - 15.00 PL The role of fungi in circular and sustainable bioeconomy
Marina Tišma
Josip Juraj Strossmayer University of Osijek, Faculty of Food Technology Osijek, Franje Kuhača 18, 31000 Osijek, Croatia

15.00 - 15.20 INV Neat and loaded CaO-based catalysts from natural or waste sources for the triacylglycerols methanolysisis reaction
Dalibor Marinković
University of Belgrade, Institute of Chemistry, Technology and Metallurgy, National Institute of the Republic of Serbia, Negoševa 12, Belgrade, Serbia

Bone regenerative medicine faces a number of challenges that need to be adequately addressed in order to heal bone tissue. One of the key issues that must be solved is to achieve proper vascularization. Bone tissue engineering offers a number of promising strategies to overcome this problem. The aim of this research was to analyze vascularization markers expression in ectopic osteogenic constructs. Two types of constructs were prepared. One type was prepared in accordance with the biological triad principle and these constructs contained *in vitro* cultivated mice' adipose-tissue derived mesenchymal stem cells combined with the source of growth factors and loaded onto bioceramic biomaterial as a carrier. The other type of constructs contained bioceramic biomaterial carrier only. Constructs were implanted ectopically and, after one early and one late post-implantation period, explanted and analyzed regarding the relative expression of vascularization marker genes (*Egr1* and *Vcam1*) and immunoexpression of protein markers (CD31 and VEGFR-2). The expression of both gene and protein markers was higher in the constructs enriched with the cells and the source of growth factors. Our results unequivocally show the potential of bioceramic biomaterials enriched with cells and growth factors for application in bone regenerative medicine.

X-ray diffraction analysis of mechanically activated natural zeolite

Nataša Đorđević[1], Jovica Stojanović[1], Mirko Grubišić[1], Slavica Mihajlović[1]

[1]Institute for Technology of Nuclear and Other Mineral Raw Materials, Belgrade, Serbia

In this research, preliminary investigations of the influence of mechanical energy during the milling process on a sample of natural zeolite were performed. Activation was performed in a mill with a ceramic vessel and ceramic balls for 15, 30 and 60 minutes. The XRD method was used to determine the phase composition. The XRD patterns were obtained on a Philips PW-1710 automated diffractometer using a Cu tube operated at 40 kV and 30 mA. All the XRD measurements were performed at room temperature in a stationary sample holder. Crystallite domain size were calcuclated using SiroQuant v4 software. The mineral composition of the

analyzed sample is as follows: clinoptilolite-heulandite zeolite types, smectite/chlorite minerals, quartz, feldspars, mica, and irregularly interstratified clay minerals. Crystallinity degree of all present phases decreases with activation time in comparison to the non-activated sample. Crystallite domain size for diffration maximum (020) of non-activated sample was 533 Å (FWHM 0.240 o), and decreases with acitivation time to 202 Å (FWHM 0.275 o) for sample activated 60 min.

A bio-epoxy surface adhesive for adherence of the wooden component species with desirable adhesion strength was developed with inclusion of bio-based resources, tannic acid and lignin. For the development of bio-epoxy adhesive, the tannic acid was used as cross-linking component, while epoxy functionalized lignin was used for bisphenol A (BPA) replacement. Mechanics, rheological properties, and the possibility of adhered phase de-application were assessed on the bio-substituted samples and compared to commercially available epoxides.
Determination of tensile shear strength of adhesive joints was performed according to SRPS EN 205. Tests were conducted on hydraulic machine for testing of mechanical properties of wood samples "Wood tester WT4", with a measuring scope of 40 kN and at the testing speed of 3 mm/min. Test samples were conditioned at the relative humidity of 65 % ± 5% and temperature of 20 ± 2 ^{o}C, prior to testing and after 7 days in standard atmosphere, they fulfill minimum values of adhesive strength for thin bond lines according to SRPS EN 12765.
Considering our aim, the sample composed of 10 wt.% epoxy functionalized lignin, 70 wt.% BPA thermoset, and 20 wt.% of tannic acid cross-linker was demonstrated to be the most suitable among those analyzed, as it was characterized by reduced BPA content and desired boundary area.
